

TESTING PROGRAMS

A complete kindergarten through grade 12 testing series shall be implemented in the School District of Amery. This testing will help teachers understand student abilities and levels of achievement. Tests shall be given in each class during each grading period. These tests shall be scheduled during the regular class period and at times fitting to the materials being covered. Examinations at the end of each course (each semester course or full-year course) shall be administered according to schedules set by building principals.

District-approved tests may include standardized achievement tests.

The School District of Amery shall not discriminate in the methods, practices and materials used for testing, evaluating and counseling students on the basis of sex, race, color, national origin, ancestry, creed, religion, pregnancy, marital or parental status, sexual orientation, handicap or physical, mental, emotional or learning disability. Discrimination complaints shall be processed in accordance with established procedures.

Exceptional Educational Needs (EEN) Students

Students with disabilities are obligated to take mandated standardized achievement tests. Students with disabilities who are exempt from these tests are those who have been opted out by parents.

The determination of whether or not to test must be made on a case-by-case basis. The building principal, regular classroom teacher and EEN teacher(s), in consultation with the child's parent/guardian, shall make the final decision. Students with disabilities who are eligible for test modifications can receive them. Such modifications may include increasing the administration time, administering the test in shorter segments and/or in smaller groups, using enlargement equipment or marking the test for the student.
