

STUDENT ACADEMIC STANDARDS

2024-2025 ANNUAL NOTICE

ANNUAL NOTICE

The School District of Amery has a responsibility for maintaining a minimum program of instruction guaranteed by the Wisconsin State Statute 118.30(1g)(a) and for initiating improvements beyond that minimum. The relevant statutes encompass standards in mathematics, science, reading and writing, geography, and history. Professional staff, under the direction and supervision of the curriculum coordinator, are delegated the responsibility for developing curriculum changes and additions. The SDA School Board approves the adoption of pupil academic standards on an annual basis. The SDA establishes standards and aligns their curriculum and instruction. SDA K-12 English language arts and mathematics are based upon the Common Core State Standards (CCSS). All other program areas are based upon the most current Wisconsin Model Academic Standards, National Standards-Next Generation Science Standards (NGSS) and College Career and Civic Life (C3) Framework for Social Studies Standards.

The Relationship Between: Vision, Principles, Process, Content

- Wisconsin Academic Standards specify what students should know and be able to do in the classroom. They serve as goals for teaching and learning.
- Setting high standards enables students, parents, educators, and citizens to know what students should have learned at a given point in time.
- In Wisconsin, all state standards serve as a model. Locally elected school boards adopt academic standards in each subject area to best serve their local community.

WHY ARE ACADEMIC STANDARDS IMPORTANT?

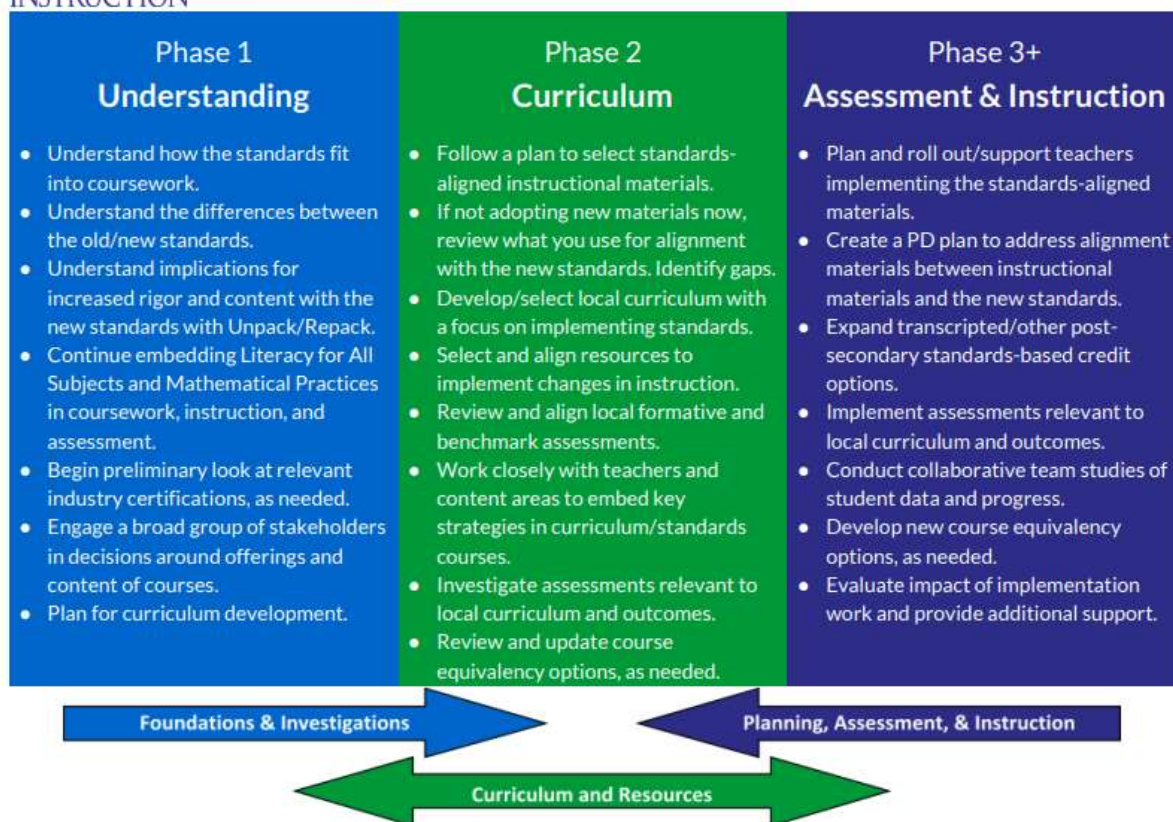

We must ensure that all children have equal access to high quality education programs. Clear statements about what students must know and be able to do are essential in making sure our schools offer opportunities to get the knowledge and skills necessary for success beyond the classroom.

GUIDING PRINCIPLES

- Every student has the right to learn
- Instruction must be rigorous and relevant
- Purposeful assessment drives instruction and affects learning
- Learning is a collaborative responsibility
- Students bring strengths and experiences to learning
- Responsive environments engage learners

The Relationship between
Vision, Principles, Process, Content

given subject or content area.

Standards serve as goals for student learning, guideposts for classroom instruction, and a framework for assessment. Academic standards also provide a foundation for the development of local curriculum. Clear statements about what students must know and do are essential to ensure that our schools offer opportunities to acquire the knowledge and skills necessary for success and prepare our students to be college and career-ready following high school graduation.

Questions about curriculum and academic standards can be directed to Jessica D'Ambrosio, Director of Curriculum. She can be contacted by **email** or phone (715) 268-9771 ext. 274. Or please, reach out to your school building principal.
