

School Staff Training Videos for Administering Medications

Following are the links to the DPI nurse consultant webcasts. The Amery School District uses this format to train staff to safely administer both routine and emergency medications. School staff are asked to watch the first three webcasts listed and those staff that work in the office/health rooms are asked to watch all five of these webcasts.

Ms. Gallagher will refer to skills and competency testing which may or may not be required based on the student population that you serve and your job description.

SCHOOL STAFF

Oral (32:20 minutes)
